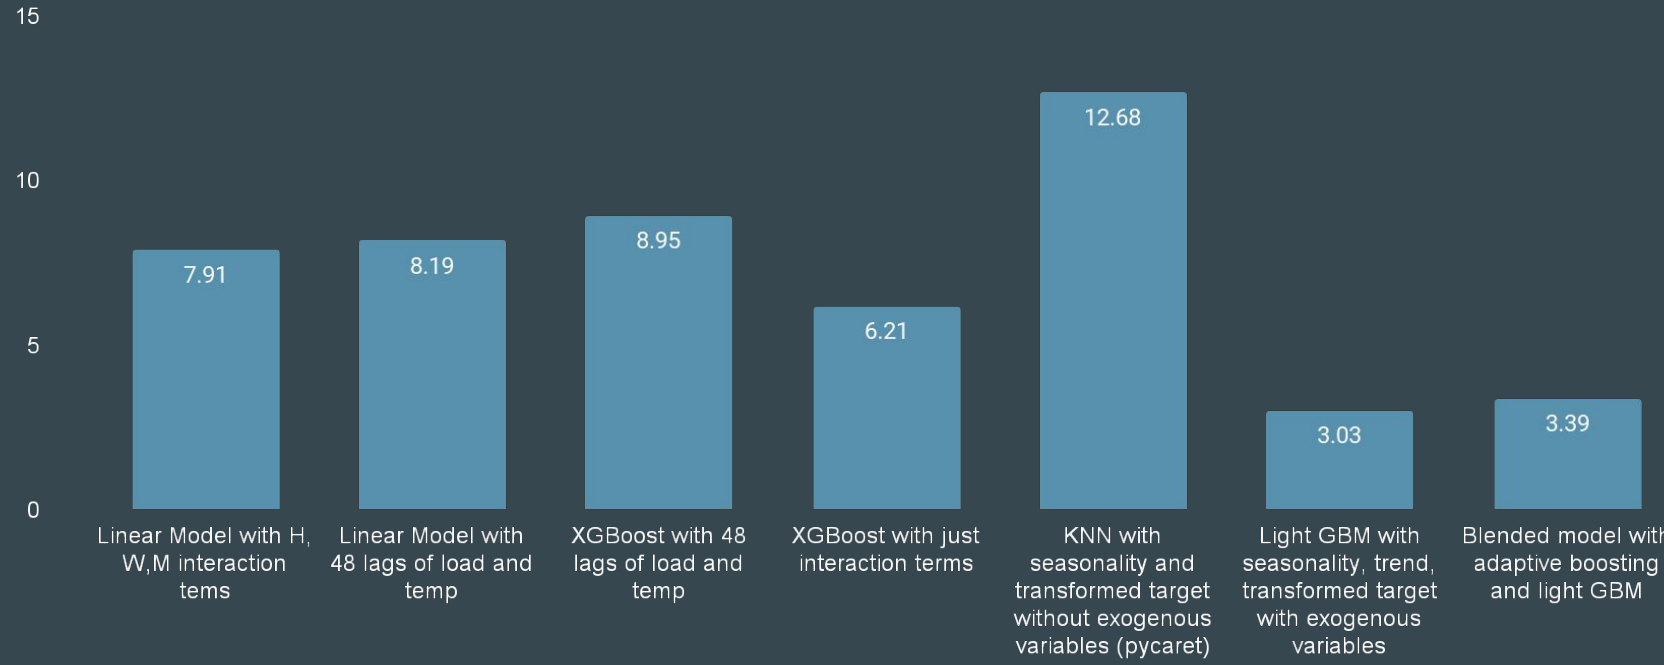
Energy forecasting

Pranay Bhaskar Mallipudi, Pratik Khadse

Model performance



Best Model: Light Gradient Boosting w/ Cond. Deseasonalize & Detrending

- Base algorithm: Gradient boosted decision trees
- #Trees: 100
- Learning rate: 0.1
- Seasonality type: additive
- Seasonality considered: W,H,M
- Primary seasonality: W
- Window length: 52

Thank you
